## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claims***

2. Claims 1-17 are pending.

### ***Claim Objections***

3. Claim 12 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 1 requires the presence of the hydrophilic layer and the image forming layer.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Mori et al. (US 6,399,270 B1).

Art Unit: 1752

a. Mori et al. teach a printing plate comprising at least one component layer which can be hydrophilic and an image forming layer can be provided thereon (column 12, lines 41-52). A light-to-heat converting material may be contained in either layer (column 13, lines 30-41). The image recording layer contains a thermally fusible material such as fatty acid amides which can be used in combination and may be covered in particulate form with a metal oxide preferably (column 12, lines 55-67; column 13, line 50 – column 17, line 2). The hydrophilic component layer meets the present limitations for the hydrophilic layer. The image recording layer meets the present limitations for the image forming layer.

### ***Allowable Subject Matter***

6. Claims 1-11, 15-16 and 17 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

a. There is no teaching or suggestion in US 6,399,270 B1 of the component layer (when hydrophilic) comprising an electron providing dye precursor as required in the present claims.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. In US 2004/0103805 A1 Mori teach a printing plate material comprising a substrate and a component layer (abstract).

Art Unit: 1752

b. In US 2004/0055490 A1, Sampei teach a printing plate precursor comprising an aluminum support and a component layer comprising an image formation layer containing heat melting particles or heat fusible particles (abstract).
